Listing of Claims:

Claim 1. (Original) A semiconductor integrated circuit device having integrated circuits with different functions integrated into one semiconductor chip, the semiconductor integrated circuit device comprising:

a semiconductor chip;

a separating region, formed in the semiconductor chip, for separating the semiconductor chip into a plurality of integrated circuit formation regions, said separating region being exposed to entire said faces of the semiconductor chip; and

integrated circuits formed in the integrated circuit formation regions, respectively, said integrated circuits having different functions, at least one of the integrated circuits performing a function fluctuating a potential of the integrated circuit formation region in which said at least one of the integrated circuits is formed.
